

This rice has been grown using the pure water that flows from the elvan slopes of Mt. Wolchul National Park onto the fertile reclaimed land that lies along Yeongsan River. It is the common brand of Yeongam County. The variety was unified and only composite organic fertilizers low in agricultural chemicals are used to improve the quality. In a word, it is cultivated in an environment-friendly manner. It is quality rice that has a wholesome and nourishing flavor.

Features of Dalmaji rice
